DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Lumby et al.

There is disclosed in Lumby a machine for injecting liquids, comprising: an air booster pump 108 for receiving injectate; and a plurality of heads 12-19 having apertures 21-24 for nozzles, each said head being in fluid communication with the pump.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Otsuka et al. in view of Tanaka et al.

There is disclosed in Otsuka a machine for injecting liquids, comprising: a plurality of air pumps 4 for receiving injectate; and a plurality of heads 10 in fluid communication with one of the pumps.

Tanaka discloses that it is known in the art to have a fluid injection head 7, the injection head having apertures (formed at the tip of branch pipes 23) for nozzles.

It would have been obvious to one skilled in the art to substitute the heads of Otsuka with that disclosed in Tanaka, in order to inject fluid into a meat product without damaging the meat.

Allowable Subject Matter

Claims 15 and 18-22 are allowed.
